

Policy clarification statement to be read with the policy guideline - November, 2015

On 20 November 2015 the Ministerial Council agreed to a statement clarifying the original intent of the Policy Guideline for the Fortification of Food with Vitamins and Minerals:

The intent of the Policy Guideline for the Fortification of Food with Vitamins and Minerals is to not permit voluntary fortification of a food category, or products within a food category, that are high in salt, sugar or fat, or foods with little or no nutritional value. FSANZ should use recognised nutrition profiling tools and initiatives that are capable of identifying foods that are high in salt, sugar or fat, or little or no nutritional value, to determine which foods are appropriate for fortification.
